

User Requirements Gathering for the Humanities

Oxford's involvement in the CREE project

<http://www.hull.ac.uk/esig/cree/>

Tony Brett

Head of IT Support Staff Services
Oxford University Computing Services
tony.brett@oucs.ox.ac.uk

CREE Project Partners

- **The University of Hull** (e-Services Integration Group, Academic Services)
- **The University of Oxford** (Oxford University Computing Services)
- **The University of York** (Archaeology Data Service)
The University of Edinburgh (EDINA)
- **Newark and Sherwood College**

CREE Project Aims

- Assess, test and document user requirements for Internet-based search tools both through their native interfaces and embedded within portal and non-portal environments in a broad range of user contexts.
- Investigate and document generic aspects of adapting a range of existing search tools and toolkits (JAFER toolkit, GetRef, GetCopy, HEIRPORT, and Google APIs) for presentation using the WSRP and JSR 168 portlet standards, facilitating their integration with any conformant national or institutional portal.
- Investigate in detail, test and document the practical integration of these tools with reference portal implementations. CREE will actively seek other national and institutional portal reference implementations with which to test software components.

CREE: User Requirements Activity

CREE project meeting
11th February 2005

THE UNIVERSITY OF HULL

Center of
Excellence

User evaluation

JISC

- How do users want to search?
- How do they currently search?
- What requirements do users have for searching?
- How might different contexts affect searching?

CREE Survey

JISC

- National survey carried out
- September - October 2004
- Over 4500 responses
- 2500 of them came from Oxford!
- Used Multimedia Flash-based card sort toolkit

THE UNIVERSITY OF HULL

Center of
Excellence

Card sort toolkit

Reset

Not Necessary	Unimportant	Important	Very Important
	Card 2 Card 4 Other library catalogue(s) first	Card 3 Card 5 Subject specific resources first	Card 1 By relevance ranking - best matches first

Card 6
By date of publication - most recent first

5 / 6

If you were able to search more than one online resource at a time, what priority would you give to the order in which your search results were displayed?

Next

Web + Library Searching: tell us how you'd like to do it!

Do you use Internet and library search tools?

Fill in a short questionnaire and you could win
an **iPod music player** or **£100 Amazon or Marks and Spencer vouchers!**

The survey should take less than ten minutes to complete.
The prize draw will take place on 29th October 2004.

The JISC-funded CREE project is investigating user preferences for conducting library resource and Internet searches. We intend to use the information we gather to inform the development of next-generation Internet and library search tools.

The Contextual Resource Evaluation Environment (CREE) is a project arising from the Joint Information Systems Committee (JISC) Portals: Investigations into User Requirements & Sustainability.

Email : *(needed to enter prize draw)*

Age:

Gender: Male
 Female

University Department:

College affiliation (if any):

Primary Role

Q1. How often do you use Internet search tools?

- Daily
- Weekly
- Monthly
- Less than monthly
- Never

Q1a. How do you usually assess the quality of online material retrieved by searching the Internet?

Q2. How often do you use Internet search tools for purposes connected with teaching, learning and/or research?

- Daily
- Weekly
- Monthly
- Less than monthly
- Never

Q3. Which Internet search tools and directories do you use most often for teaching, learning and/or research?

	Frequently	Occasionally	Never used	Never heard of
Google	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Ask Jeeves	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
AltaVista	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

CREE Focus groups

JISC

- 11 groups held: 5 staff and 6 student
 - >60 people from across disciplines
- University of Hull, University of Oxford, Newark and Sherwood College
 - Including online focus group at Hull
- Testing results from the survey
- Gathering experience and views in depth

What did the survey find?

JISC

- 85% used Internet search tools daily
 - 61% used them daily for learning, teaching or research
- 67% used subject-specific resources
- 68% used the local library catalogue at least weekly
- 54% used other library catalogues at least monthly

Simultaneous searching?

Would you find it useful?

- Always
- Depends on search
- Never

JISC

Catalogues and Internet search tools

Library catalogues

THE UNIVERSITY OF HULL

Sun
microsystems

Center of
Excellence

Simultaneous searching

JISC

- Focus groups agreed that simultaneous searching was a good thing, but with caveats
- Saves time
- Google and others!
 - Though common search of library catalogues OK
- Needs to be done well, or results are not usable

Search tools and the VLE

JISC

Using Internet search tools whilst using an LMS

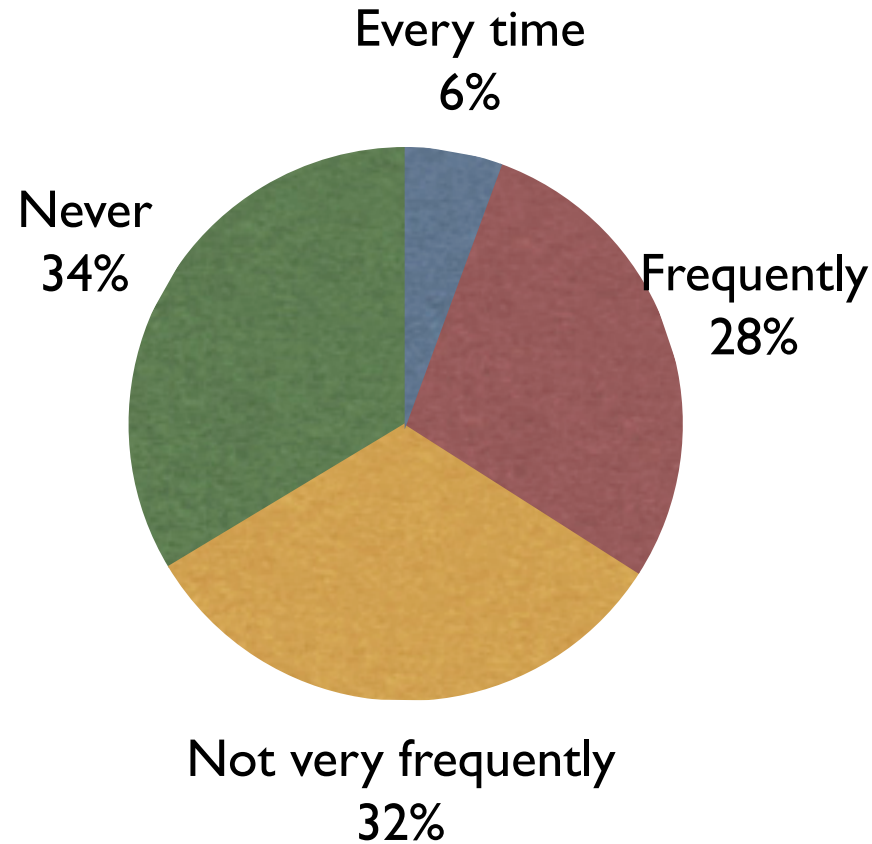

THE UNIVERSITY OF HULL

Center of Excellence

Catalogues and the VLE

JISC

Use of library catalogues whilst using an LMS

THE UNIVERSITY OF HULL

Center of Excellence

Searching from within an VLE?

Would you find it useful?

- Always
- Depends on search
- Never

JISC

Searching resources from within an LMS

Searching whilst using an VLE

JISC

- Focus groups had a strong preference for multiple windows
 - Allows control of the search tools used
 - Considered to be as quick
- Access to quick reference tools considered useful, though
 - Dictionary, thesaurus etc.

Displaying search results

What priority would you give to displaying different results?

Very important
Important

JISC

Displaying results in the LMS

JISC

Would you like search results to appear within the LMS?

THE UNIVERSITY OF HULL

Center of
Excellence

Displaying search results

JISC

- Focus groups were more concerned with the way results were displayed, not the order
- Preferred results sets to be separate, not a single list
- If a single list, then de-duplication is a priority

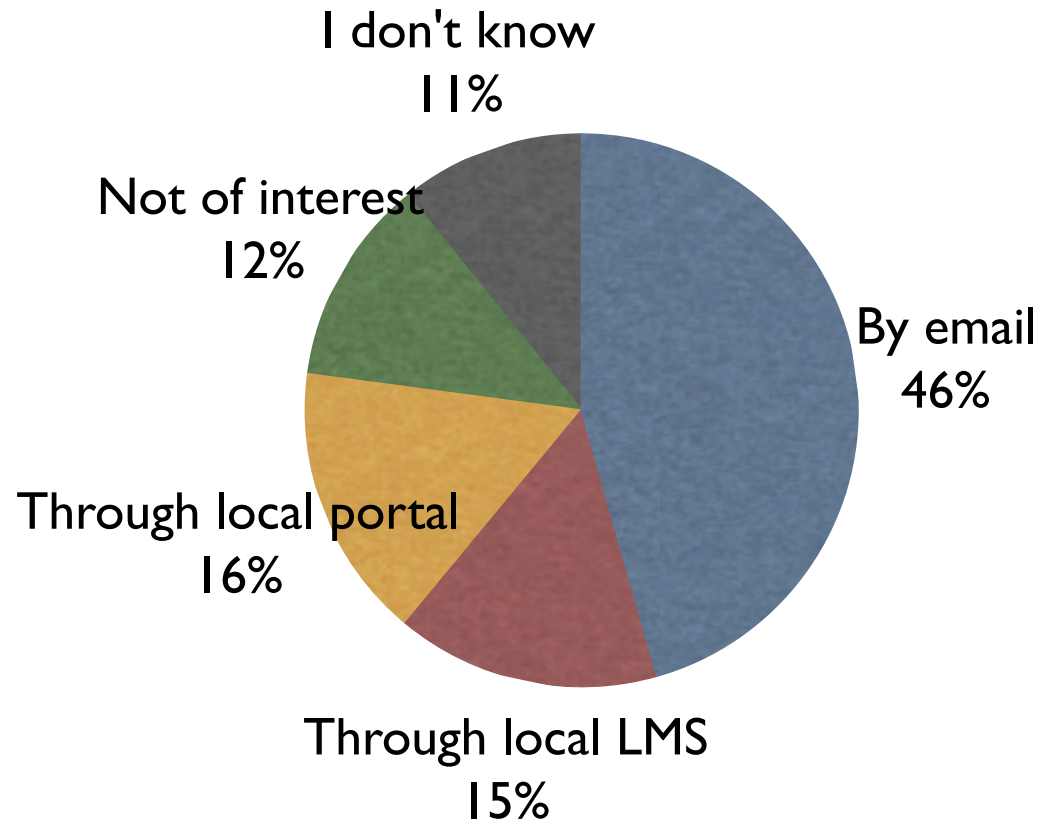

THE UNIVERSITY OF HULL

Keeping informed

JISC

Would you like to be notified of new resources as they become available, and how?

THE UNIVERSITY OF HULL

Center of Excellence

Further focus group findings I

JISC

- Google is used by everyone
 - Usually as first choice and starting point
 - Sometimes as last resort!
- But users are aware of the role of more specific search tools
 - Choice of tool is according to need

Further focus group findings 2

JISC

- How search tools are used depends on purpose of search
 - Assignments - whatever can be found
 - Research - more considered approach
- Quick use can lead to later advanced use

THE UNIVERSITY OF HULL

Further focus group findings 3

JISC

- Two search strategies are used
- Discovery - when nothing is known
 - Google, bibliographic databases
- Location - when item is known
 - Library catalogue, local and other
- Preference for searching only those resources that are available (i.e., can be located)

Lessons Learnt

THE UNIVERSITY OF HULL

Center of
Excellence

Survey

JISC

- Wide advertising worked well
- Good spread of respondents across HE and FE
- Slight bias across user groups
 - Many library staff responded
- Errors in data mean some analysis not possible

Focus Groups

JISC

- Great trouble recruiting students until right incentive in place AND advertised in right place
- Need to approach directly, not through staff
- Staff interest OK but limited by time commitments
- Very valuable exercise

User testing

THE UNIVERSITY OF HULL

Center of
Excellence

Aims of testing

JISC

- Investigate the use of search tools in different environments and contexts
 - Institutional portal
 - VLE
 - Standard web page
- Re-visit ideas from survey and focus groups and test further

Search tools: CREE

JISC

- JAFER (can be configured to local catalogue)
- GetRef (may need local profile)
- ADS
- Google

Search tools: Other

JISC

- Go-Geo!
- Connect
- zetoc
- RDN-include

Demonstrators

JISC

- Institutional portal
 - Hull and Oxford - uPortal
 - Newark and Sherwood?
- VLE
 - Screenshots based on Sakai
 - WebLearn?
- Webpages

Types of testing

JISC

- A. Have individual users in controlled environment or user's workplace, answering questions from interviewer
- B. Online interaction and response in user's workplace via questionnaire
- C. Focus groups with demo on screen
- D. Paper prototyping with groups

Proviso of testing

JISC

- We are testing the presentation of the tools
- We are testing the type of the tools
(catalogue/bibliographic/search engine)
- We are NOT testing the tools themselves

THE UNIVERSITY OF HULL

Testing timetable

JISC

- Development of demonstrators and testing regimes
 - Feb - Mar 05
- User testing
 - Mar - May 05

The End

- Questions?
- Thanks to Chris Awre, Hull for allowing me to use his slides
