What is a Virtual Research Environment?

Definition of a VRE:

"The purpose of a VRE is to help researchers in all disciplines manage the increasingly complex range of tasks involved in carrying out research. A VRE will provide a framework of resources to support the underlying processes of research on both small and large scales, particularly for those disciplines which are not well catered for by the current infrastructure." (JISC)

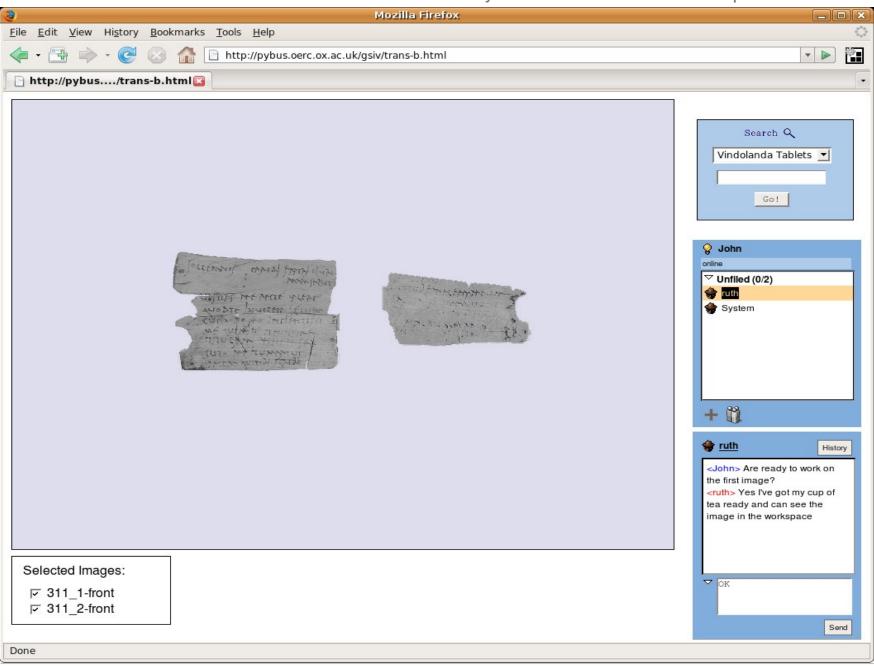

"A set of online tools, systems and processes interoperating to facilitate or enhance the research process within and without institutional boundaries." (Mike Fraser – OUCS)

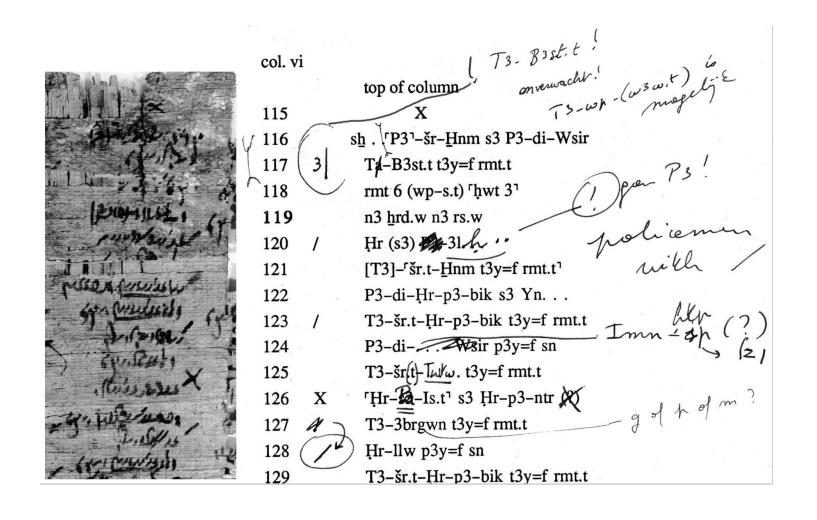

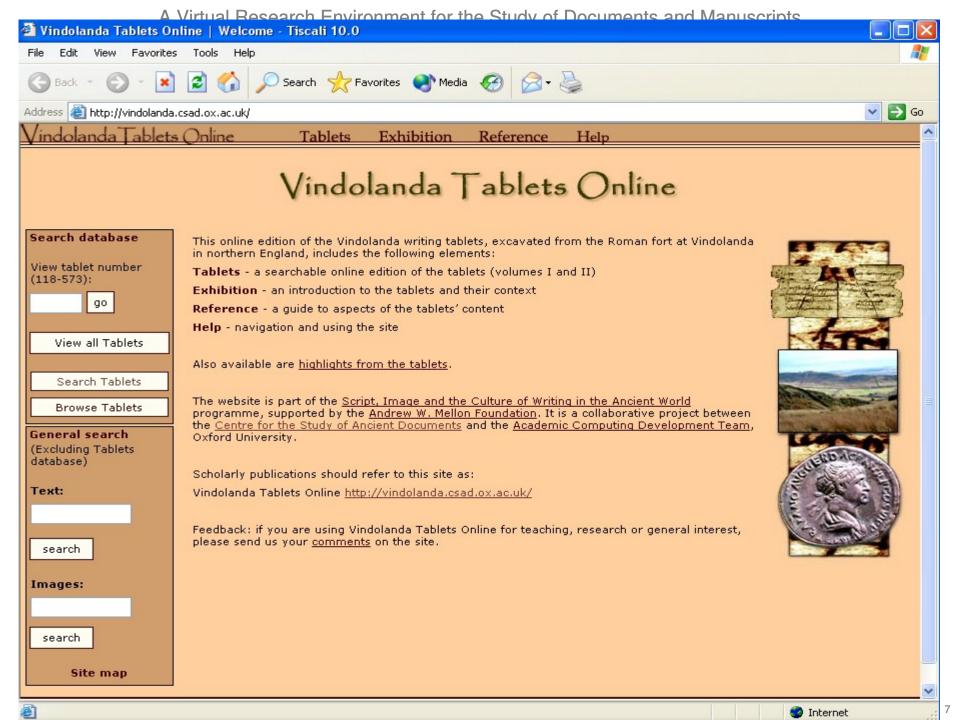

- 15 month project (started summer 2005)
- Capturing user requirements from researchers across the division
- How do the Humanities differ from large scale Science?
- No predefined technology (ground up approach)
- Build 3 to 4 prototypes/demonstrators

The Task

Reading the Lycopolite census from Rifeh

A Virtual Research Environment for the Study of Documents and Manuscripts

- Technology moves on:
 - Portal standards → web gadgets
- Improve look and feel

- Links to Interpretation Support System
 - More complex workflows
- Allow user to control image processing from web browser
 - ENGAGE project
